Instructions

The tax map index is an overlay used by the Floyd County Tax Assessor's Office to divide the county into tax districts based on population density. There are three divisions: The largest districts are 10,000 feet by 10,000 feet and are the least dense. For more dense populations, these districts are broken into 5,000 feet by 5,000 feet areas. And the densest population areas are broken into 2,500 feet by 2,500 feet areas.

The numbering convention for tax map districts uses a grid pattern. The format is column and then row with letters identifying columns and numbers identifying rows. To keep the system uniform, all numbers are two digits, i.e., 01, 02, 03.

10,000 by 10,000-foot grids are identified by a letter and a two-digit number, i.e., A12, G08, H09.

5,000 by 5,000-foot grids are identified by a letter, two-digit number, and a letter with the final letter being either W, X, Y, or Z, i.e., G12X, H13W, I13Z.

2,500 by 2,500-foot grids are identified by a letter, two-digit number, and a letter with the final letter being A-P, i.e., H13P, J13O, J14A.
